Notes to Financial Highlights:

- a. For additional information and analysis concerning the Company's balance sheet and results of operations, reference is made to the Company's quarterly supplemental disclosures for the relevant periods furnished on the Company's Current Report on Form 8-K made available on the Company's website at www.acadiarealty.com.
- b. See the Restatement 8-K filed with the SEC on February 15, 2022 for a detailed reconciliation to previously reported amounts and a detailed description of adjustments thereon. As mentioned in the press release, the Company is restating its prior period financial statements for the years and interim periods ended December 31, 2020 and 2019, and as of and for each of the quarterly periods ended March 31, 2021 and 2020, June 30, 2021 and 2020, September 30, 2021 and 2020 and December 31, 2020 for errors in accounting primarily related to the reclassification of two consolidated joint-venture subsidiaries. The restatement primarily impacts the classification of certain amounts within the Company's consolidated balance sheets, statements of operations and statements of cash flows.

- c. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common shares of the Company were exercised or converted into common shares. The effect of the conversion of units of limited partnership interest (“OP Units”) in Acadia Realty Limited Partnership, the “Operating Partnership” of the Company, is not reflected in the above table; OP Units are exchangeable into common shares on a one-for-one basis. The income allocable to such OP units is allocated on the same basis and reflected as noncontrolling interests in the consolidated financial statements. As such, the assumed conversion of these OP Units would have no net impact on the determination of diluted earnings per share.
- d. The Company considers funds from operations (“FFO”) as defined by the National Association of Real Estate Investment Trusts (“NAREIT”) and net property operating income (“NOI”) to be appropriate supplemental disclosures of operating performance for an equity REIT due to their widespread acceptance and use within the REIT and analyst communities. In addition, the Company believes that given the atypical nature of certain unusual items (as further described below), “FFO before Special Items” is also an appropriate supplemental disclosure of operating performance. FFO, FFO before Special Items and NOI are presented to assist investors in analyzing the performance of the Company. They are helpful as they exclude various items included in net income that are not indicative of the operating performance, such as gains (losses) from sales of real estate property, depreciation and amortization, and impairment of real estate property. In addition, NOI excludes interest expense and FFO before Special Items excludes certain unusual items (as further described below). The Company’s method of calculating FFO and NOI may be different from methods used by other REITs and, accordingly, may not be comparable to such other REITs. Neither FFO nor FFO before Special Items represent cash generated from operations as defined by generally accepted accounting principles (“GAAP”), or are indicative of cash available to fund all cash needs, including distributions. Such measures should not be considered as an alternative to net income (loss) for the purpose of evaluating the Company’s performance or to cash flows as a measure of liquidity. Consistent with the NAREIT definition, the Company defines FFO as net income (computed in accordance with GAAP), excluding gains (losses) from sales of real estate property, plus depreciation and amortization, impairment of real estate property, and after adjustments for unconsolidated partnerships and joint ventures. Also consistent with NAREIT’s definition of FFO, the Company has elected to include gains and losses incidental to its main business (including those related to its RCP investments such as Albertsons) in FFO. FFO before Special Items begins with the NAREIT definition of FFO and adjusts FFO to take into account FFO without regard to certain unusual items including charges, income and gains that management believes are not comparable and indicative of the results of the Company’s operating real estate portfolio and, in particular, the impact of the mark-to-market gain and loss attributable to the Company’s investment in Albertsons.
- e. The pro-rata share of NOI is based upon the Operating Partnership’s stated ownership percentages in each venture or Fund’s operating agreement. Does not include the Operating Partnership’s share of NOI from unconsolidated joint ventures within the Funds.
