Notes to Financial Highlights:

- (1) For additional information and analysis concerning the Company's balance sheet and results of operations, reference is made to the Company's quarterly supplemental disclosures for the relevant periods furnished on the Company's Current Report on Form 8-K, which is available on the SEC's website at www.sec.gov and on the Company's website at www.acadiarealty.com.
- (2) Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common shares of the Company were exercised or converted into common shares. The effect of the conversion of units of limited partnership interest ("OP Units") in Acadia Realty Limited Partnership, the operating partnership of the Company (the "Operating Partnership"), is not reflected in the above table; OP Units are exchangeable into common shares on a one-for-one basis. The income allocable to such OP units is allocated on the same basis and reflected as noncontrolling interests in the consolidated financial statements. As such, the assumed conversion of these OP Units would have no net impact on the determination of diluted earnings per share.
- The Company considers funds from operations ("FFO") as defined by the National Association of Real Estate Investment Trusts ("NAREIT") and net property operating income ("NOI") to be appropriate supplemental disclosures of operating performance for an equity REIT due to their widespread acceptance and use within the REIT and analyst communities. In addition, the Company believes that given the atypical nature of certain unusual items (as further described below), "FFO Before Special Items" is also an appropriate supplemental disclosure of operating performance. FFO, FFO Before Special Items and NOI are presented to assist investors in analyzing the performance of the Company. The Company believes they are helpful as they exclude various items included in net income (loss) that are not indicative of operating performance, such as (i) gains (losses) from sales of real estate properties; (ii) depreciation and amortization and (iii) impairment of depreciable real estate properties. In addition, NOI excludes interest expense and FFO Before Special Items excludes certain unusual items (as further described below). The Company's method of calculating FFO, FFO Before Special Items and NOI may be different from methods used by other REITs and, accordingly, may not be comparable to such other REITs. Neither FFO nor FFO Before Special Items represent cash generated from operations as defined by generally accepted accounting principles ("GAAP"), or are indicative of cash available to fund all cash needs, including distributions. Such measures should not be considered as an alternative to net income (loss) for the purpose of evaluating the Company's performance or to cash flows as a measure of liquidity.
 - a. Consistent with the NAREIT definition, the Company defines FFO as net income (computed in accordance with GAAP) excluding:
 - i. gains (losses) from sales of real estate properties;
 - ii. depreciation and amortization;
 - iii. impairment of real estate properties;
 - iv. gains and losses from change in control; and
 - v. after adjustments for unconsolidated partnerships and joint ventures.
 - b. Also consistent with NAREIT's definition of FFO, the Company has elected to include: the impact of the unrealized holding gains (losses) incidental to its main business, including those related to its RCP investments such as Albertsons in FFO.
 - c. FFO Before Special Items begins with the NAREIT definition of FFO and adjusts FFO (or as an adjustment to the numerator within its earnings per share calculations) to take into account FFO without regard to certain unusual items including:
 - charges, income and gains that management believes are not comparable and indicative of the results of the Company's operating real estate portfolio;
 - the impact of the unrealized holding gains (losses) incidental to its main business, including those related to its Retailer Controlled Property Venture ("RCP") investments such as Albertsons; and
 - iii. any realized income or gains from the Company's investment in Albertsons.

- (4) The Company defines Special Items to include (i) unrealized holding losses or gains (net of noncontrolling interest share) on investments and (ii) other costs that do not occur in the ordinary course of our underwriting and investing business.
- (5) The pro-rata share of NOI is based upon the Operating Partnership's stated ownership percentages in each venture or Investment Management's operating agreement and does not include the Operating Partnership's share of NOI from unconsolidated partnerships and joint ventures within Investment Management.

- 1. Acadia's "Promoted Share" reflects Acadia's share of fund profits once all partners (including Acadia) have received a return of their cumulative contributions plus their cumulative preferred return. Acadia's Promoted Share equals a 20% promote plus Acadia's pro-rata share of the remaining 80%.
- 2. With regard to Fund II, the additional contributions over original Fund Size reflects prior-period distributions that were re-contributed to the Fund during 2016, 2020, 2021 and 2022 to fund the on-going redevelopment of existing Fund II investments. The \$472 million reflects an incremental \$172 million of capital contributed in connection with the City Point recapitalization. Fund II contains one remaining investment, City Point. During the second quarter 2022, the Company increased its ownership in Fund II and Mervyns II from 28% to 40%. Additionally, during the third quarter 2022, the Company increased its ownership in Fund II from 40% to 61.7%. During the first quarter 2023, Mervyns II distributed the Albertsons shares to its investors upon expiration of the lock-up agreement.
- 3. Net of fees and promote. Fund I has made its final distribution and was fully liquidated in 2018.
- 4. Unfunded Commitments are set aside to complete leasing and development at existing fund investments. The Unfunded Commitment will not equal Fund Size less Cumulative Contributions in those instances where certain fund distributions have been marked as recallable or where the fund has released commitments due to, among other reasons, the closing of the fund's investment period or accelerated asset sales.
- 5. Implied Capital is Fund Size less capital attributed to sold investments or released.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements contained in this supplemental disclosure may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities and Exchange Act of 1934 and as such may involve known and unknown risks, uncertainties and other factors which may cause the Company's actual results, performance or achievements to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements. Forward-looking statements, which are based on certain assumptions and describe the Company's future plans, strategies and expectations are generally identifiable by use of the words "may," "will," "should," "expect," "anticipate," "estimate," "believe," "intend" or "project" or the negative thereof or other variations thereon or comparable terminology. Factors which could have a material adverse effect on the operations and future prospects of the Company include, but are not limited to those set forth under the heading "Risk Factors" in the Company's Annual Report on Form 10-K. These risks and uncertainties should be considered in evaluating any forward-looking statements contained or incorporated by reference herein.

USE OF FUNDS FROM OPERATIONS AS NON-GAAP FINANCIAL MEASURE

The Company considers funds from operations ("FFO") as defined by the National Association of Real Estate Investment Trusts ("NAREIT") to be an appropriate supplemental disclosure of operating performance for an equity REIT due to its widespread acceptance and use within the REIT and analyst communities. FFO is presented to assist investors in analyzing the performance of the Company. It is helpful as it excludes various items included in net income that are not indicative of the operating performance, such as gains (or losses) from sales of property and depreciation and amortization. Consistent with the NAREIT definition, the Company defines FFO as net income (computed in accordance with GAAP), excluding (i) gains (or losses) from sales of depreciated properties; (ii) depreciation and amortization; (iii) impairment of depreciable real estate properties; (iv) gains (losses) from change in control and (v) after adjustments for unconsolidated partnerships and joint ventures. Also consistent with NAREIT's definition of FFO, the Company has elected to include the impact of the unrealized holding gains (losses) incidental to its main business, including those related to its RCP investments such as Albertsons in FFO.

The Company also provides another supplemental disclosure of operating performance, adjusted funds from operations ("AFFO"). The Company defines AFFO as FFO adjusted for straight line rent, non-real estate depreciation, stock-based compensation, amortization of finance costs and costs of management contracts, tenant improvements, leasing commissions and capital expenditures.

The Company may also provide from time to time another supplemental disclosure of operating performance, FFO Before Special Items. The Company defines FFO Before Special Items as FFO adjusted for certain unusual items including (i) charges, income and gains that management believes are not comparable and indicative of the results of the Company's operating real estate portfolio; (ii) the impact of the unrealized holding gains (losses) incidental to its main business, including those related to its RCP investments such as Albertsons and (iii) any realized income or gains from the Company's investment in Albertsons.

It should be noted that the Company's methods of calculating FFO, AFFO or FFO Before Special Items may be different from methods used by other REITs and, accordingly, may not be comparable to such metrics used by other REITs. FFO, AFFO and FFO Before Special Items do not represent cash generated from operations as defined by generally accepted accounting principles ("GAAP") and are not indicative of cash available to fund all cash needs, including distributions. None of these measures should be considered as an alternative to net income for the purpose of evaluating the Company's performance or to cash flows as a measure of liquidity.

USE OF NON-GAAP FINANCIAL MEASURES

Non-GAAP financial measures such as EBITDA, NOI, same-property NOI and lease spreads are widely used financial measures in many industries, including the REIT industry, and are presented to assist investors and analysts in analyzing the performance of the Company. They are helpful as they exclude various items included in net income that are not indicative of operating performance, such as gains (or losses) from sales of property and depreciation and amortization and is used in computing various financial ratios as a measure of operational performance. The Company computes EBITDA as the sum of net income before extraordinary items plus interest expense, depreciation, income taxes and amortization, less any gains (losses including impairment charges) on the sale of income producing properties. The Company computes NOI by taking the difference between Property Revenues and Property Expenses as detailed in this reporting supplement. Same-property NOI includes properties in our Core Portfolio that we owned for both the current and prior periods presented, but excludes those properties which we acquired, sold or expected to sell, and redeveloped during these periods. The Company's method of calculating EBITDA, NOI and same-property NOI may be different from methods used by other REITs and, accordingly, may not be comparable to such other REITs. EBITDA, NOI and same-property NOI do not represent cash generated from operations as defined by GAAP and are not indicative of cash available to fund all cash needs, including distributions. They should not be considered as an alternative to net income for the purpose of evaluating the Company's performance or to cash flows as a measure of liquidity.
